NEON CRYPT - Tester Tech Sheet

LeonLink / Arcadeline Epic · Build: Oct 19 2026 (commit 5c2132f)

Item	Detail
Play URL	https://neon-crypt-goodbyedawg-7221s-projects.vercel.app
Repo	github.com/leonptucker3886-lab/neon-crypt
Tech	Single index.html; HTML5 Canvas raycaster (Doom-style); Web Audio API synth sound; no install
Hosting	Vercel (manual deploys; no auto-deploy from GitHub yet)
Platforms	Desktop (keyboard+mouse) and mobile/tablet (touch)
Modes	I'LL STEER (default) / WALK FOR ME (FAST & TACTICAL)

Game flow

• LeonLink intro: 'LEONLINK PRESENTS...', full-screen anchor logo spins 5s, 'ARCADELINE' + 'EPIC'.

• 'NEON CRYPT' title flickers in, creepy clown music starts, scary clown lunges in.

• Pick mode (buttons under clown; clicking clown = normal mode).

• SunNFun story cutscene (typewriter; tap to skip).

• 3 zones: SunNFun Midway, The Funhouse, The Big Top. Win = 'YOU ESCAPED SUNNFUN'.

Enemies

• Juggler clowns (purple) - throw fireballs.

• Balloon-head clowns (pink, floating) - spit projectiles.

• Strongman clowns (big, red) - charge; angle in during Walk For Me.

Controls

• Desktop: move with keyboard, aim with mouse, click to fire, Shift = sprint, R = stop/walk toggle (Walk For Me).

• Mobile: left thumb = move/steer, FIRE button, yellow STOP/WALK button in Walk For Me.

Walk For Me specifics

• Auto-walk ~60% faster; auto-turns at walls to follow corridors.

• Auto-faces visible clowns within ~10 tiles; slight aim assist.

• Clowns: 1.8x health, +30% damage, strafe, keep range, lead shots.

Test focus (priority order)

• 1. Mobile Walk For Me: does auto-turn feel natural or too strong? Getting stuck on walls/doors?

• 2. Difficulty balance: is +30% damage / 1.8x health fair? Fights too long?

• 3. Intro clown tap + mode buttons work on phone and desktop.

• 4. Clown readability at distance; each type distinguishable.

• 5. Sound balance: music vs SFX, heartbeat, laughs/honks; audio starts after first tap.

• 6. Cutscene pacing and skip; zone title cards.

• 7. Low-health effects (red pulse, 'THE CLOWNS SMELL BLOOD').

• 8. Performance/FPS on older phones; screen rotation; pause / You Died / Floor Cleared menus.

Known issues / notes

• Browsers mute audio until first tap/click - expected.

• Not hands-on playtested by the developer yet; code verified to run without errors only.

• Best score is stored locally in the browser.

How to report a bug

• Include: device + OS, browser, mode (Steer/Walk For Me), zone, what happened vs expected, steps to reproduce, screenshot/video if possible.

• Severity: Blocker (can't progress) / Major / Minor / Polish.

• File as a GitHub Issue on the repo or send to Leon.
